

## **Hawkmoon Resources Corp. (HM-CSE) Cartier Resources Inc. (ECR-V) :**

### **Hawkmoon Resources advancing the Wilson Property**

On January 25, 2022, Hawkmoon reported final assay results from its final 2 drill holes from the 2021 drill program at the Midrim Showing on the Wilson Gold Project. The Wilson Gold Project is located ~15 km east of the Municipality of Lebel-sur-Quévillon in Abitibi, Québec and 170 km NE of the city of Val-d'Or in the heart of the Abitibi Greenstone Belt. Recall Cartier (<https://ressourcescartier.com/>) had reported on April 26, 2021 the execution of an option agreement with Hawkmoon (<https://hawkmoonresources.com/>) as per optioning 100% of its interests in the Wilson Property. During the 5-year option period, Hawkmoon shall have the sole and exclusive right and option to earn a 100% interest on the Wilson Property by paying Cartier an amount aggregating \$1M in cash, issuing 5M common shares and incurring a minimum of \$6M in expenditures (including at least 24,000 m of diamond drilling). Upon the exercise of the option, Cartier shall be granted a 2% NSR production royalty on the Wilson Property, half of which (1% NSR) shall be redeemable for \$4M.

**New discovery from Hawkmoon:** Hawkmoon has released final drill results on the Wilson Gold Project that suggests some success in regards to gold endowment. The final assay results for the final 2 drill holes from the 2021 drill program gave values up to 1m @ 83.6 g/t Au (HMW 21-28) and expand the Midrim Showing to the east, west and south. This high-grade sample result in HMW 21-28 is a discovery of a new gold zone at the Midrim Showing and is located ~50 m south of all previously known gold mineralization at Midrim. HMW 21-28 also likely extended the Midrim to the east with 1m @ 0.61 g/t Au as it extends a historical intercept in hole V-1 (1.2 m @ 21.70 g/t Au) situated ~30 m to

the west. Hole HMW 21-27 with 2 low grade intercepts of ~1 g/t Au over 1 m also extended gold mineralization ~30 m to the east. With a total 5 drill holes in the area, Hawkmoon has likely increased the footprint of the Midrim Showing and gold mineralization remains open in many directions.

**Progress being made on Wilson:** The 2021 drill program by Hawkmoon amounted to 28 holes for 5,031m and investigated the Toussaint and Midrim Showings as well as extensions on the Wilson Gold Project. The overall grade x thickness metric amount to an estimated 11.19 g/t Au x meter for all 28 holes of the 2021 drill program. Notable variations in grades demonstrate the prevalence of a “nugget effect” commonly seen in Archaean aged gold mineralization. The most prospective areas of the Wilson Gold Project are along the contacts between volcanic tuffs and gabbro or dioritic intrusions. Mineralization is associated with strong silica, sericite and calcite alteration within strongly foliated, sheared and fractured tuff. Ankerite and chlorite alteration are present to a lesser degree and pyrite is the dominant sulphide mineral. Quartz veins as well as quartz veinlets are associated with a significant portion of the gold mineralization.

It is to note that Hawkmoon has increased its land position with the acquisition of Wilson East Property on November 25, 2021. The Wilson Gold Project now totals 1,998 ha (42 claims), is very easily accessible and lies in the heart of Osisko Mining's (OSK-T) district scale play in the Urban Barry Belt, 75km west of the Windfall Lake gold deposit (22,507Mt @ 9.38 g/t Au for 6,789 M oz. Au as of January 10, 2022).

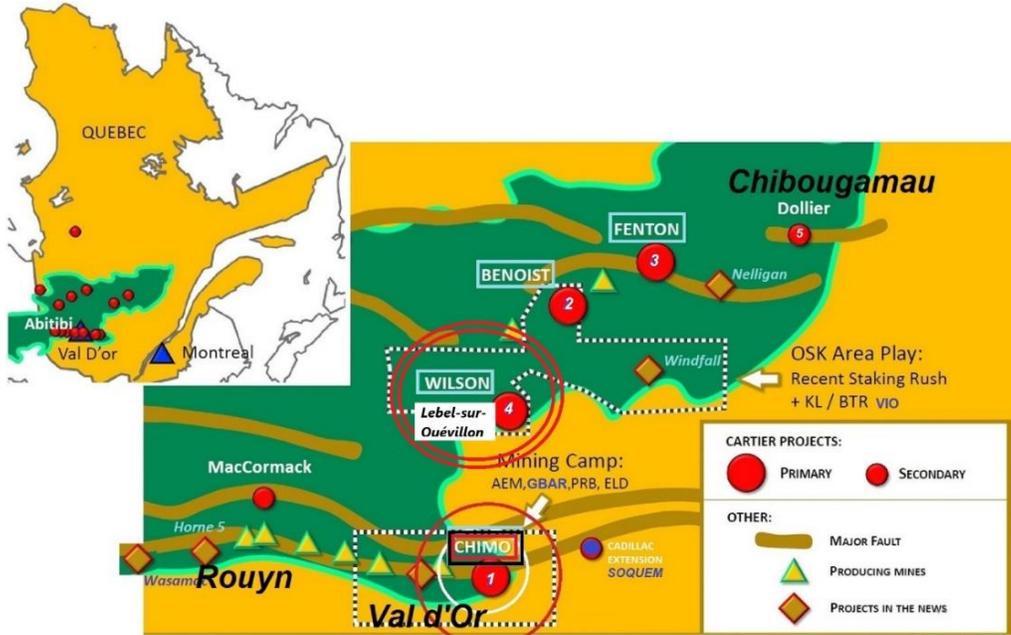

Recall on August 22, 2017, Cartier had reported drill results from 19 holes (8,050 m) completed on the Wilson property from March to June 2017. The 2017 Wilson drill program objectives were to explore the lateral and depth extensions of known gold concentrations hosted in the Toussaint and Midrim structures. Hawkmoon's 2021 drilling appears to have confirmed the historical intercepts and more importantly extended

certain areas of gold endowment that shall likely require more surface and drilling work in 2022. The 2021 drill results of Hawkmoon permit Cartier to execute a multi-prong strategy of advancing its flagship Chimo development project while pursuing other exploration plays through its own or by strong partnership.

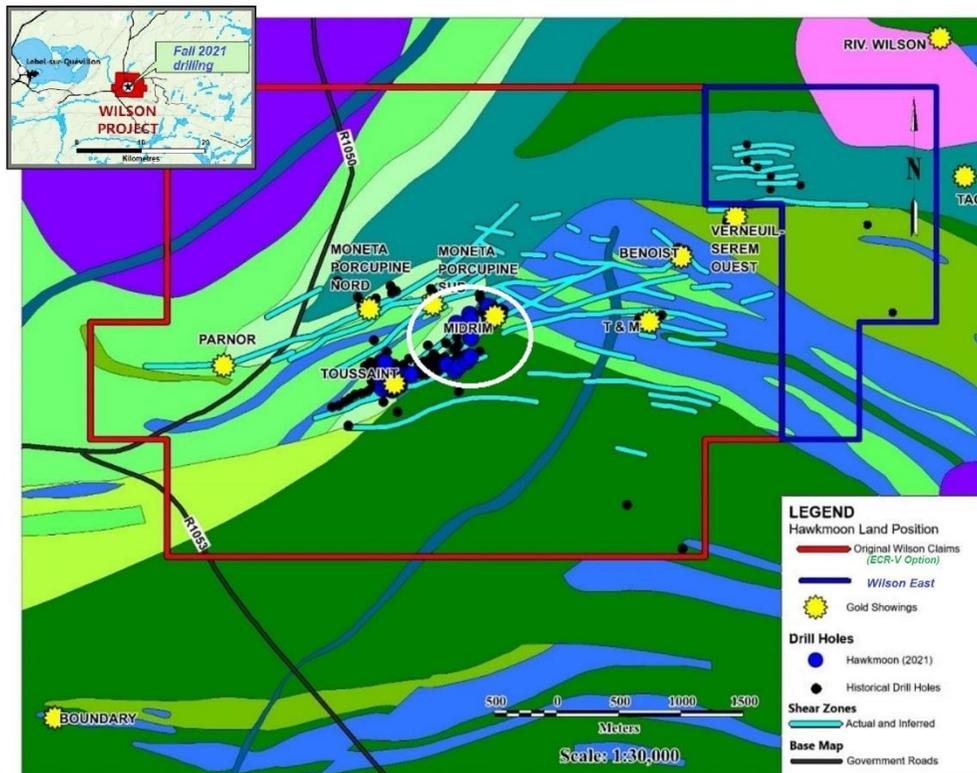

Hawkmoon remains entirely focused on its Quebec gold projects located in one of the world's largest gold endowed areas, the Abitibi Greenstone Belt. These gold projects are accessed by government-maintained roads and are in close proximity to the towns of Lebel-sur-Quévillon and Belleterre. <b>Hawkmoon Resources Corp.</b>	<b>HM-CSE</b>	<b>R, Z</b>

### \* Legend

- A The Mining Analyst, in his own account or in a family related account, owns securities in excess of 1,000 shares of the issued and outstanding equity securities of this issuer.
- B The Mining Analyst, in his own account or in a family related account, owns securities in excess of 10,000 shares of the issued and outstanding equity securities of this issuer.
- C The Mining Analyst, in his own account or in a family related account, owns securities in excess of 30,000 shares of the issued and outstanding equity securities of this issuer.
- D The Mining Analyst, in his own account or in a family related account, owns securities in excess of 50,000 shares of the issued and outstanding equity securities of this issuer.
- E The Mining Analyst, in his own account or in a family related account, owns securities in excess of 100,000 shares of the issued and outstanding equity securities of this issuer.
- F The Mining Analyst, in his own account or in a family related account, owns securities in excess of 250,000 shares of the issued and outstanding equity securities of this issuer.
- V The Mining Analyst has visited material operations of this issuer, namely Wilson project with ECR-V in 2017.
- P This issuer paid a portion of the travel-related expenses incurred by the Mining Analyst to visit material operations of this issuer.
- Q This issuer has directly paid the Mining Analyst for the June 26, 2018 Analyst Report.
- R This issuer has indirectly paid the Mining Analyst.
- Z This issuer has retained the Mining Analyst as a Technical Advisor.

### Mining Analyst Certification

I, Éric Lemieux, Mining Analyst, hereby certify that the comments and opinions expressed in this report accurately reflect my personal views about the subject and the issuer.

I determine and have final say over which companies are included in my research and do not have direct or indirect remuneration unless disclosed.
