Cartier Adds Second Drill on Chimo Mine Property

Val-d'Or, October 10th, 2017 – Cartier Resources Inc. (TSX-V: ECR) ("Cartier") is pleased to announce that a second drill has been mobilized on Chimo Mine property, located 45 km to the East of Val-d'Or. It will be used to explore the depth extension of the gold mineralization of Zone 5M ([FIGURE](#)). The Chimo Mine produced 379 012 ounces of gold (Source: MRNF, DV85-05 to 97-01) of which the majority came from Zone 5M.

The current program consists of 44 drill holes ([TABLE](#)) that will potentially cut up to 177 times the extension of the known gold zones and up to 281 times the structures that host the gold zones. A third drill will be added towards the end of this year to complete the deep drilling program below Zone 5M. Results of the current drilling are pending.

« *The Chimo Mine drill program is progressing as planned and so far, has intersected the structures, alteration and mineralization*» commented Philippe Cloutier, President and CEO of Cartier.
