Incorporation and Nature of Operations

Cartier Resources Inc. (the "Company"), initially incorporated under Part 1 A of the Québec *Companies Act* on July 17, 2006, has been governed by the *Business Corporations Act* (Quebec) since February 14, 2011. The Company's head office is located at 1740, chemin Sullivan, Suite 1000, Val-d'Or, Québec. Its activities primaily include the acquisition and exploration of mining properties in Canada.

The Company has not yet determined whether these properties contain economically recoverable ore reserves. Although, at the current stage of the exploration work, the Company is taking all industry standard measures to ensure that the mining property titles in which it has a financial interest are in good standing, these measures in place do not guarantee property titles to the Company. Property titles may be subject to prior unregistered agreements or non-compliance with regulatory requirements.

The recoverability of amounts reported for mining properties and deferred exploration expenses is dependent on the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development and future profitable production, or the proceeds of the transfer of such property. At the date of the financial statements, the carrying value of mining properties and deferred exploration expenses represents, in management's opinion, the best estimate of their net recoverable value. This value could however be reduced in the future.

On August 18, 2020, the Company's Board of Directors approved these unaudited interim condensed financial statements for the period ended June 30, 2020.

1. Basis of preparation and going concern

These unaudited interim condensed financial statements were prepared on a going concern basis, using historical costs method, except for "Other short-term financial assets" which are measured at fair value.

The unaudited interim condensed financial statements have been prepared on a going concern basis, meaning that the Company will be able to realize its assets and discharge its commitments and liabilities in the normal course of operations. The Company's ability to continue as a going concern depends on its ability to realize its assets and to obtain additional financing. While the Company has been successful in securing financings in the past, there can be no assurance it will be able to do so in the future. The Company believes it has sufficient liquidity to meet its obligations for the next 12 months. The Company has not yet determined whether its properties contain economically recoverable ore reserves, nor has it generated revenues from operations. The recoverability of the amounts shown for mining properties is dependent upon the existence of economic ore reserves, the ability of the Company to obtain the necessary financing to explore and develop its properties, and upon future profitable production or proceeds from the disposal of properties.

In March 2020, the World Health Organization declared the COVID-19 epidemic a pandemic. The situation is continually evolving, and the measures put in place have numerous economic repercussions at the global, national, provincial and local levels. These measures, which include travel bans, solitary confinement or quarantine (voluntary or not), and social distancing, have caused significant disruption among businesses, globally and in Canada, due to the economic slowdown. Governments and central banks have responded by implementing monetary and fiscal measures to stabilize the world economy; however, the current challenging economic climate may cause adverse changes in cash flow, the level of working capital and the search for future financing, which could have a direct impact on the Company's future financial position. The Company has implemented measures to mitigate the impact of the pandemic on its future operations.

The above conditions indicate the existence of material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern.

These unaudited interim condensed financial statements do not reflect the adjustments to the carrying values of assets and liabilities, the reported amounts of expenses and the classification of statement of financial position items if the going concern assumption was deemed inappropriate, and these adjustments could be material.

1. Basis of preparation and going concern (continued)

These unaudited interim condensed financial statements have been prepared by the Company's management in accordance with ("IFRS"), and in accordance with IAS 34, "Interim Financial Reporting". They do not include all the information required in annual financial statements in accordance with IFRS. These unaudited interim condensed financial statements should be read in conjunction with the audited financial statements for the year ended December 31, 2019.

These unaudited interim condensed financial statements have been prepared using the same accounting methods used in the audited financial statements for the year ended December 31, 2019.

The preparation of unaudited interim condensed financial statements in accordance with IAS 34 requires the use of certain critical judgments and accounting estimates. It also requires management to exercise judgment when applying the Company's accounting policies.

In preparing these unaudited interim condensed financial statements, the important judgments that were made by management in applying the Company's accounting policies and the main sources of estimation uncertainty were the same as those described in the audited financial statements for the year ended December 31, 2019.

2. Cash and cash equivalents

As at June 30, 2020 and December 31, 2019, cash and cash equivalents included an account bearing interest and an account without interest, as shown below:

13. Financial Instruments

Objectives and policies in managing financial risks

The Company is exposed to various financial risks resulting from its operations and investing activities. The directors and officers of the Company manage those risks.

The Company does not enter into speculative derivative financial instruments.

Financial risks

The following paragraphs describe the main financial risks to which the Company is exposed as well as its risk management policies.

Interest risk

As at June 30, 2020, the Company is not exposed to interest rate risk since no financial instrument bears interest.

Liquidity risks

The Company establishes cash forecasts to ensure it has the necessary funds to fulfill its obligations. Obtaining additional funds makes it possible for the Company to continue its operations. While the Compagny has been successful in doing so in the past, there is no assurance it will be able to do so in the future.

13. Financial Instruments (continued)

Liquidity risk analysis

Liquidity risk management serves to maintain a sufficient amount of cash and to ensure that the Company has adequate financing sources such as private and public investments.

Over the year, the Company has financed its exploration expense commitments, working capital requirements and acquisitions through private and flow-through financings.

Sensitivity to credit risk

The Company's exposure to credit risk is limited to the carrying value of its financial assets at the date of presentation of the financial information as disclose below:

	June 30,	December 31,
	2020	2019
	\$	\$
Cash and cash equivalents	5,432,621	7,670,167

None of the Company's financial assets are secured by collateral or other credit enhancements.

The credit risk for cash and cash equivalents and cash reserved for exploration is considered negligible, since the counterparties are reputable financial institutions with high quality external credit ratings.

Fair value of financial instruments

The Company discloses the fair value hierarchy by which the financial instruments are evaluated and assigned to the following levels. Level 1 features a valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 includes inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 3 includes inputs for the asset or liability that are not based on observable market data. Marketable securities are classified under Level 1.

The carrying amount of cash and cash equivalents, cash reserved for exploration, accounts payables and accrued liabilities approximate the fair value based on the close date.

The carrying amount of the non-current liability, which includes the loan, approximates its fair value because market conditions have not changed significantly between the date of the transactions and June 30, 2020.

14. Contingencies and commitments

The Company is partially financed through the issuance of flow-through shares. However, there is no guarantee that its expenses will qualify as Canadian exploration expenses, even if the Company is committed to taking all the necessary measures in this regard. Refusal of certain expenses by the tax authorities would have a negative tax impact for investors.

If the Company does not incur eligible exploration expenditures it will be required to indemnify the holders of such shares against all taxes and other expenses incurred as a result of the Company not incurring the required exploration expenses.

During the six-month period ended June 30, 2020, the Company did not receive any amount (\$3,021,873 as at December 31, 2019) from flow-through financings. From this amount received in 2019, \$2,317,338 was used during the six-month period ended June 30, 2020 (\$648,325 as at December 31, 2019). As of June 30, 2020, there is an amount of \$56,210 (\$2,373,548 as of December 31, 2019) which must be spent as eligible exploration expenses before December 31, 2020.

The Company renounced tax deductions related to the flow-through financings and a liability related to flow-through shares issued in 2019, totaling \$970,097 was recorded at the time of issuance (see note 9). Management was required to incur eligible exploration expenditures before December 31, 2020. As at June 30, 2020, the flow-through share liability was \$22,995 (\$763,489 as at December 31, 2019).

15. Transactions with key management personnel

The Company's key management personnel are members of the Board of Directors, the president, the vice-president and chief financial officer. The remuneration of key management personnel includes the following expenses:

	Six-month periods ended		Six-month periods ended	
	June 30,	June 30,	June 30,	June 30,

16. Related party transactions

The Company had no related party transactions during the six months ended June 30, 2020. During the year ended December 31, 2019, the Company paid \$680 to the spouse of a director for consultant fees. As at December 31, 2019, this amount has been recorded in administrative expenses under "Business development (analysts and brokers)" in the statements of profit or loss, and no amount is payable.

17. Capital disclosures

The Company's objectives in managing its capital are to ensure sufficient liquidity to pursue its organic growth strategy and undertake selective acquisitions. The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares and acquire or sell mining properties to improve its financial performance and flexibility.

The Company's capital is composed of shareholders' equity. The Company's primary uses of capital are to finance exploration expenditures and acquire properties. To effectively manage the Company's capital requirements, the Company has in place a rigorous planning and budgeting process to help determine the funds required to ensure the Company has appropriate liquidity to meet its operating and growth objectives.

The Company expects that its current capital resources and its ability to obtain additional financing will support further exploration and development of its mineral properties for the next 12 months.

The Company is not subject, with regards to external rules, to any requirements regarding its capital, unless the Company completes a flow-through financing for which the cash must be reserved for exploration. As at March 31, 2020, the Company has \$56,210 (\$2,373,547 as at December 31, 2019) cash reserved for exploration.

18. Subsequent Event

On August 11, 2020, the Company completed a private placement through Paradigm Capital Inc. The Company issued 21,778,200 flow-through shares at a price of \$0.43 per flow-through share for total gross proceeds of \$9,364,626.

In connection with the offering, the agent received a cash commission equal to 6% of the gross proceeds received by the Company and broker warrant, equal to 6% of the number of flow-through shares sold pursuant. Each broker warrant shall entitle the holder thereof to acquire one common share at a price of \$0.43 for a period of 12 months following the closing date.
